GAZETTEER

OF

EAST TIMOR

Compiled by

Kevin P. Sherlock.

GAZETTEER OF EAST TIMOR

This gazetteer is from a card-index I compiled in 1975 from the map PROVÍNCIA DE TIMOR issued during the 1960's by the Junta de Investigações do Ultramar, Lisbon, and is intended to be used in conjunction with it. As copies of this map are currently having wide distribution in Australia, though with the title altered to "Democratic Republic of East Timor", a gazetteer would now be of some assistance, whatever one's motivation.

NO RESTRICTION IS PLACED ON PHOTOCOPIES OF THIS GAZETTEER.

EXPLANATORY NOTES

Information given is limited to place-name, designation, administrative district, latitude and longitude.

* Complete references are given only for those place-names appearing on the above-mentioned map which is on a scale of 1:500,000; additional names from the 1:50,000 maps will not be included until a full set of that series can be obtained.
* Alternate spellings and names are cross-referenced to the forms given on the map.
* The following designations are used:-

  Bay, Dist.=District, Mtn. =Mountain, Popl.=Populated
  Cape, Isld.=Island, MtnR.=Mountain Range, Centre,
  Channel, Lake Plat.=Plateau, Strm.=Stream.

* Popl. (Populated Centre) is used without distinction from the capital to the smallest hamlet. Where two places of the same name occur in the same administrative district they are numbered in the gazetteer, e.g., Ainaro (1) and Ainaro (2) which are both in Ainaro district; where they occur in different districts no numbers have been given, e.g., Maumeta, which occurs three times. For the sake of convenience, the island of Ataúro has been treated here as a separate district although it was part of the Dili district.
* Heights of mountains are included in metres if that information was given on the map.
* As mountains and rivers frequently form the boundaries of administrative districts, many of these features have been listed twice under different districts where it has been impossible to ascertain from the map to which, if either, district they should be attributed.
* The designation Strm. (Stream) encompasses all watercourses, whether permanent or seasonal. Where a stream passes through more than one district a reference is given for each district. The latitude and longitude are given for the farthest down-stream point in that district, e.g., river mouths or the points of departure from one district to the next, rather than where the names appear on the map.
* GAZETTEER entries for districts give the references for the north, south, east and west extremities of each.

I would be grateful if any errors in my reading of the map could be brought to my attention.

Kevin P. SHERLOCK,
6 Lampe Street,
Fannie Bay,
Darwin, N.T. 5790,
Australia.
20 April 1977.
